PROFESSIONAL SUMMARY

Aspiring back-end developer proficient in building scalable web applications using PHP, Laravel, Python, and Django. Skilled in designing RESTful APIs, managing relational databases (MySQL), and implementing authentication systems. Passionate about clean code, problem-solving, and contributing to impactful server-side solutions.

PROJECTS

Learning Management System (LMS) | [GitHub](#)

- Developed a multi-role authentication system (student/instructor/admin) using Laravel and SQLite.
- Integrated Google OAuth2 for secure sign-up/login, with admin dashboards for course management and user request approvals.
- Designed scalable database schemas and implemented CRUD operations for course enrollment and user profiles.

Little Lemon Restaurant Web App | [GitHub](#)

- Built a reservation system and dynamic menu interface using Django, MySQL, and RESTful APIs.
- Enabled real-time table bookings and daily dish updates with JavaScript for frontend interactivity.
- Optimized database queries to reduce latency by 30% and ensure seamless user experience.

Task Manager API | [GitHub](#)

- Built a Laravel-based RESTful API to manage tasks with full CRUD functionality.
- Implemented user registration, authentication, and middleware-based access control.
- Emphasized clean architecture and reusable service classes to improve scalability.

Event Management API | [GitHub](#)

- Developed a Laravel-powered backend for managing events and user registrations.
- Designed role-based access (organizers, attendees), email verification, and token-based authentication.
- Created scalable models for event listings, ticketing, and real-time updates.

SKILLS

Languages: PHP | Python

Databases: MySQL | SQLite

Frameworks : Laravel | Django

OAuth2 (Google Auth) | MVC Architecture | Agile | CI/CD

Tools/Concepts: RESTful APIs | Git

Additional Skills: JavaScript | Unit Testing

CERTIFICATION

- **Meta Back-End Developer Professional Certificate** | [Coursera](#)

EDUCATION

Alexandria University
Graduated: 2021

BSc in Civil Engineering

- Relevant Coursework: Python Programming, Algorithm Design

LANGUAGE

- Arabic (Native)
- English (Professional Proficiency)
